主要變數介紹：

Variable	Description
NAME	County name
STATE_NAME	State name
STATE_FIPS	State fips code (character)
CNTY_FIPS	County fips code (character)
FIPS	Combined state and county fips code (character)
STFIPS	State fips code (numeric)
COFIPS	County fips code (numeric)
FIPSNO	Fips code as numeric variable
SOUTH	Dummy variable for Southern counties (South = 1)
HR**	Homicide rate per 100,000 (1960, 1970, 1980, 1990)
HC**	Homicide count, three year average centered on 1960, 1970, 1980, 1990
PO**	County population the years 1960, 1970, 1980, 1990
RD**	Resource deprivation the years 1960, 1970, 1980, 1990 (principal component, see Codebook for details)
PS**	Population structure 1960, 1970, 1980, 1990 (principal component, see Codebook for details)
UE**	Unemployment rate the years 1960, 1970, 1980, 1990
DV**	Divorce rate the years 1960, 1970, 1980, 1990 (percentage of males over 14 divorced)
MA**	Median age the years 1960, 1970, 1980, 1990
POL**	Log of population the years 1960, 1970, 1980, 1990
DNL**	Log of population density the years 1960, 1970, 1980, 1990
MFIL**	Log of median family income the years 1960, 1970, 1980, 1990
FP**	Percentage of families below poverty the years 1960, 1970, 1980, 1990 (see Codebook for details)
BLK**	Percentage of black population for the years 1960, 1970, 1980, 1990
GI**	Gini index of family income inequality 1960, 1970, 1980, 1990
FH**	Percentage of female headed households 1960, 1970, 1980, 1990

縣名

州名

每10萬人凶殺率(n起事件)

凶殺案數，1960~90年

各縣人口數，1960~90年

失業率，1960~90年

離婚率，1960~90年

The background features several abstract geometric shapes. In the top right, there is a large, complex shape composed of multiple overlapping triangles in various shades of teal and blue. In the bottom left, there is a smaller, simpler triangular shape in a light blue-grey color. The overall aesthetic is clean and modern.

02

單&雙變數地圖

- 非地圖變數：

凶殺率，離婚率皆為連續型資料

NOTE：比率是連續型資料，用漸層色是個好選擇

- 地圖格式：

Choropleth map，又稱等值線圖，面量圖

把資料用顏色畫在對應地圖上的一種資料視覺化方式

單變數：1980年各州凶殺率

USA states

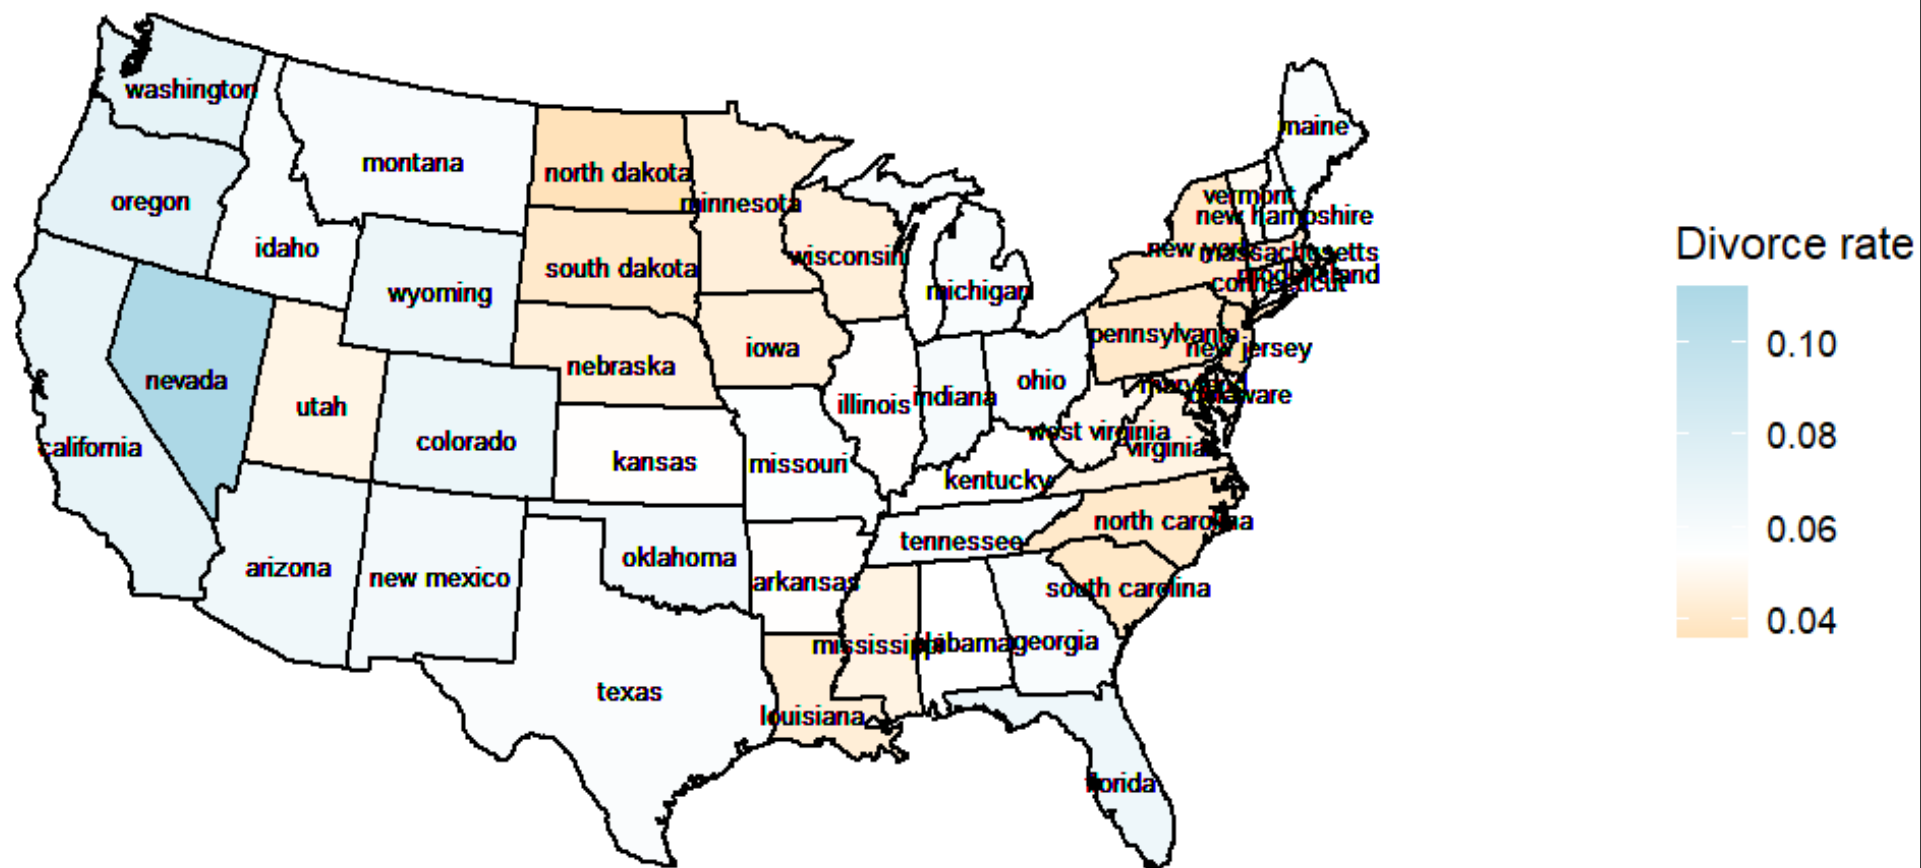

Relation with Homicide rate

單變數：1980年各州離婚率

USA states

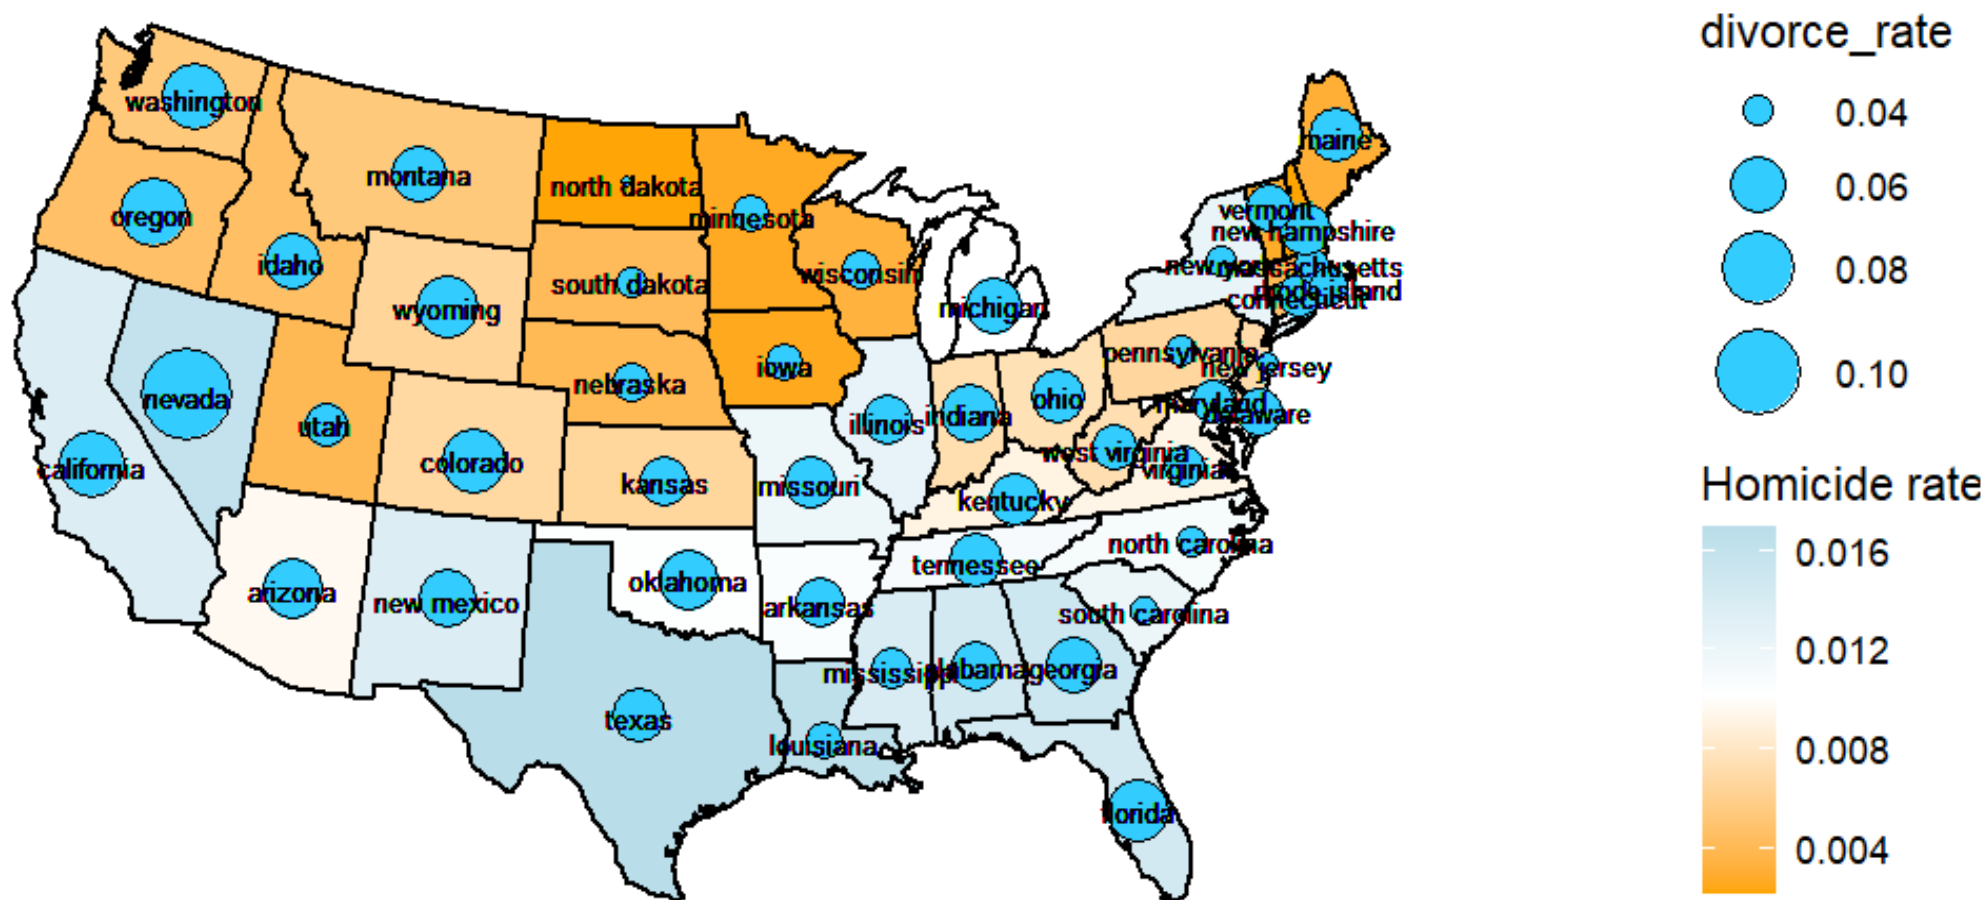

Relation with Divorce rate

雙變數：1980年各州凶殺率跟離婚率的關係

USA states

Relation with Homicide rate and Divorce rate

結論：

- 表格 < 雙變數地圖 < 兩張單變數地圖放在一起
- 地圖呈現不一定比較好，不過能發現其他東西
EX：南方凶殺率高，西部離婚率高
- 單看這兩變數關係，看相關係數最快，畫散佈圖

03

操作步驟

R

```
# install.packages('maps')
# install.packages("ggrepel")
library(maps) # For map data
library(ggplot2) # ggplot2 must be loaded to use map_data()
library(dplyr) # For arrange() function
```

```
states_map <- map_data("state") # Get map data for USA
str(states_map)
```

```
## 'data.frame': 15537 obs. of 6 variables:
## $ long : num -87.5 -87.5 -87.5 -87.5 -87.6 ...
## $ lat : num 30.4 30.4 30.4 30.3 30.3 ...
## $ group : num 1 1 1 1 1 1 1 1 1 1 ...
## $ order : int 1 2 3 4 5 6 7 8 9 10 ...
## $ region : chr "alabama" "alabama" "alabama" "alabama" ...
## $ subregion: chr NA NA NA NA ...
```

```
# 'usa' (美國的輪廓)
# 'state' (美國的每個州)
# 'county' (美國的每個縣)
```

```
mapdata = read.csv("C:/Users/user/Desktop/southorAll/ncovr/NAT.csv")
#str(mapdata)
```

```
#來源:https://geodacenter.github.io/data-and-lab/ncovr/
```

```
new_mapdata = mapdata[c('STATE_NAME', 'HR80', 'DV80', 'HC80', 'PO80', 'UE80')]
```

```
# STATE_NAME 改 region 再轉小寫方便合併
names(new_mapdata)[1] = "region"
new_mapdata$region = tolower(new_mapdata$region)

str(new_mapdata)
```

```
## 'data.frame': 3085 obs. of 6 variables:
